

SMALL BUSINESS RATES RELIEF 2017 – 2018

Below is a table of current rates for small businesses who occupy a single property which has a rateable value of between £12,000 and £15,000. This applies to the financial year 2017 – 2018. Figures are based on the small business non-domestic multiplier for 2017 – 2018 which is set at 0.466 in the pound; however these figures may vary slightly due to variations in decimal point calculations by different councils. (You may still be able to claim for small business rates relief under the 2010 rating list – contact your local authority for more details). From April 2017, rates do not need to be paid by businesses occupying one property with a rateable value below £12,000.
